

Life Bistrot Volterra

LIFE BISTROT

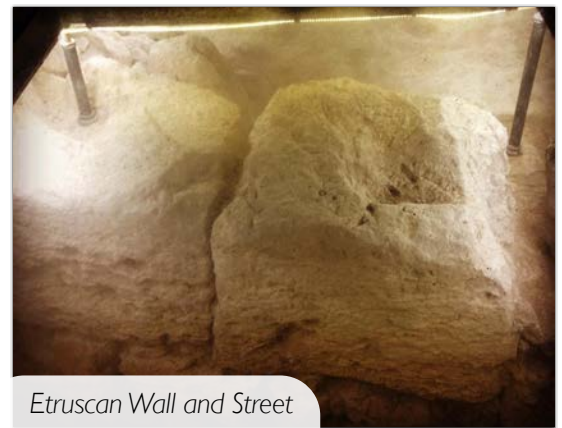

*Smart Plant Based Organic Food
Etruscan Archaeological Site Preservation*

Smart Archaeological Experience

Life Bistrot is an innovative, smart, organic and 100% plant based restaurant, built inside an archaeological area with many marvelous Etruscan ruins.

It is one of the most interesting archaeological area in the center of Volterra. The discovery dates back to 2001, when the owners began renovating the building.

Etruscan Wall and Street

Etruscan Well, 7 meters deep

Food Innovation

Life Bistrot is an innovative food by weight concept, with touch-screen software scales and table management smart cards

Food Experience

The FOOD room has departments for hot food, for cold food, for bakery, for pizza and for pastry. Guests freely make their own dish, choosing type and quantity of food they prefer, weigh at the scales and add to the smart card

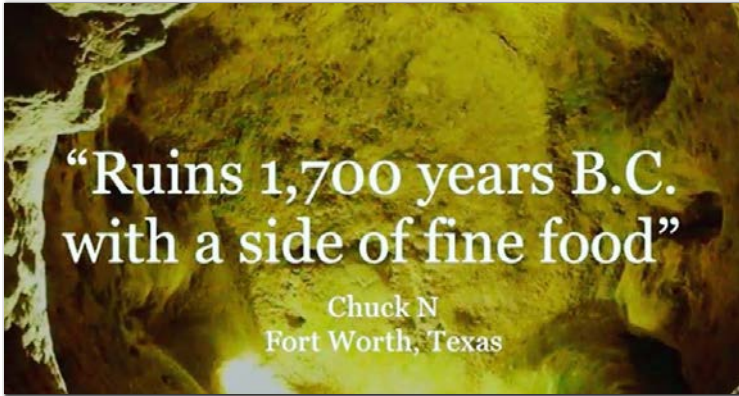

Dishes are healthy, fresh, with high quality ingredients. Much attention is on the concepts of food intolerance - gluten free and lactose free - and about the origin of the ingredients, as much as possible selected in the organic and local farms.

“

We have designed the experience easy, to allow guests to be as independent as possible. Our staff is always present, and there is always someone around to ask if someone is in trouble.

Each customer has a personal smartcard through which he can access the food buffet.

Operation is simple:

"choose a table, take your smart card, go to the food buffet. Compose your plate with your favorite food, weigh at the scales, pass your smart card on the reader and go to the table to eat. The weight of your food is automatically added on your smart card. You can come back to the food buffet several times, the smart card will keep track of each step and progressively creates your table account."

“

Life Bistrot is an innovative restaurant. We use organic products as much as possible from local farmers. In the kitchen there are great chefs, the food is extremely tasty and healthy. The food by weight system, the touch screen scales and the smart cards, combined with the Etruscan archaeological room, allow guests to live a unique, new, fun and easy experience

Life Bistrot - Smart Food Experience
